

FUNGICIDAL ACTIVE COMBINATIONS SPIROXAMINE,  
PROTHIOCONAZOLE AND TEBUCONAZOLE

ABSTRACT OF THE DISCLOSURE

The present invention relates to a novel active compound combination that is highly suitable for controlling phytopathogenic fungi which contains the known 8-tert-butyl-1,4-dioxaspiro[4.5]decan-2-ylmethyl(ethyl)(propyl)amine (spiroxamine) and other known active compounds.
